Mr. Jim Surrell  
National Sales Manager  
Hydraway  
8250 Bunkum Rd.  
Caseyville, Illinois 62232

Mr. Surrell;

Wanted to let you know the Hydraway drainage system that was installed last January at Zephyrs Stadium in New Orleans is functioning tremendous. The Chief Operating Officer and Field Manager love how fast and efficient the water drains off the surface and out of the stadium during and after a rain event. As far as I know they have canceled no games due to rain which is important to a professional baseball in terms of competition, safety and finances.

For my firm, it was great to use such a quality constructed and engineered product because the drainage system will be productive and long lasting. The high compressive strength and high inflow rate of the Hydraway product were two reasons that it was specified for this project.

Thank you for the outstanding customer service you and the Hydraway staff provided to the owners, owners representative, design team and field installation company. This service helped in making this project a success.

Sincerely,

Richard T. Moffitt
